DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/09/2009 has been entered.

Claim Objections

2. Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 19 is claims "display the transparency color bar of which transparency is varied depending on a variance". The claim does not appear to contain any further limitation from Claim 1.

Claim Rejections - 35 USC § 103

3. The rejection of Claim 1-3 & 5-20 under 35 U.S.C. 103(a) as being unpatentable over Shiki et al. (US Patent No. 7,044,913), in view of Hossack et al. (US Patent No. 6,116,244) and in view of Alexander et al. (US Patent No. 6,239,796 B1) is hereby maintained.

Response to Arguments

4. Applicant's arguments filed 02/02/2009 have been fully considered but they are not persuasive. The Examiner respectfully disagrees with the Applicant's assertion that the references fail to teach displaying either or both a luminance/hue color bar based on the information of the velocity and variance of blood flow and/or a transparency color bar based on the variance. Shiki teaches displaying color bars (Col. 20, Line 25-31) based on velocity (Col. 23, Line 20-25). Shiki fails to teach transparency in the color Doppler image and the combination of velocity and variance for bar display. However, Hossack teaches transparency [opacity] in the color Doppler image (Col. 2, Line 25-35 & Col. 3, Line 33-43 & Line 25-31) based on variance (Col. 3, Line 9-31) and combination of various ultrasound parameters such as velocity and variance (Col. 2, Line 48-52 & Col. 2, Line 65 – Col. 3, Line 8) in order to emphasize the clinical areas of interest in the display (Col. 2, Line 33-35).
